We sincerely look forward to our cooperation with you!We hope to establish long term cooperation with you and achieve our mutual benefit in the future!

**DESIGNED, TESTED
AND TRUSTED**

Wearing a face mask all day may protect you, but what about your skin?

Simple strategies for avoiding skin abrasions and injuries from

It's perfectly clear that facemasks, especially N-95 respirators, are one of the most important tools for healthcare workers in the fight against COVID-19. Those of us at home or in non-healthcare settings are asked to wear cloth masks for protection and leave the surgical and respirator masks for those who truly need them. And of those of you who do need them— doctors, nurses, and other workers in contact with sick patients—you're finding yourself wearing facemasks for hours without removing them, and then forced to put those same masks on over and over again. This is causing yet another problem: what you're wearing to protect yourself could be damaging your skin.

Surgical Mask

FFP2 Face Mask

FFP2 Face Mask

Ultrasonic Welding Technology

It is produced in the quality of Aegean mask with the latest technology fully automatic machines.

Nose Clip

It takes the shape of the nose easily.
